SUMMARY

Software Developer with 2+ years of experience building production-grade web applications using React, Next.js, and TypeScript across fintech and healthcare domains. Experienced in real-time interfaces, data-heavy dashboards, and AI-integrated features. Focused on delivering reliable, scalable frontend systems.

EXPERIENCE

***Software Engineer**, SoftSages Technology - Vadodara, Gujarat* Jul 2026 - Present

- Developed a real-time trader dashboard for an options trading platform using React 19 and TypeScript, rendering live P&L, KPIs, positions, and an orders blotter from real fills of 2 brokers; shipped to production in under 3 months.
- Engineered a real-time option chain with WebSocket streaming, OI and gamma exposure analytics, and a volume view with put/call ratio and max pain, using TanStack Query and Zustand.
- Implemented a multi-leg order ticket with React Hook Form and Zod to place, modify, cancel, and exit orders across 2 brokers (E*TRADE, Interactive Brokers), with payoff visualization.
- Delivered an option candle charts feature with Lightweight Charts, enabling traders to view option price history with live WebSocket updates, 10 and 30-minute intervals, and a contract picker.

***Software Developer**, Sattvabit - Surat, Gujarat* Mar 2024 - Jun 2026

- Led full-stack development of an AI-powered Trading Coach using Next.js and NestJS, supporting conversational AI, PDF and image uploads, and domain-specific queries; built the onboarding flow that imports historical trades and syncs activity on login.
- Built a real-time backtesting feature covering 6 market types and multiple candle intervals, with WebSocket-streamed historical data and full trade simulation including stop-loss, take-profit, and position management.
- Designed a multi-user management module for a sales intelligence platform with role-based onboarding, Zoom and Fathom integrations, webhook-driven transcript ingestion, and AI-assisted call analysis.
- Engineered modular interfaces for a multi-tenant healthcare (EMR) platform using React and Electron, and refactored a legacy B2B commerce UI with Tailwind CSS, increasing Core Web Vitals scores from 74 to 90+.

PROJECTS

AevumAI - Job Application & Email Outreach Platform AevumAi

- Built a full-stack job application platform using Next.js, TypeScript, Supabase, Google OAuth, and TipTap Editor, enabling users to manage resumes, cover letters, and application workflows from a single dashboard.
- Developed a dynamic template engine that parses user-defined variables (e.g., company name, role, HR name) and automatically generates input forms, allowing personalized email content without manual editing.
- Integrated Gmail OAuth and email delivery workflows to send personalized job applications directly from users' own Gmail accounts, with automatic resume attachment and configurable document selection.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology, B.E. in Computer Engineering August 2020 - May 2024

- CGPA: 8.33/10

CERTIFICATIONS

Frontend Developer (React) – HackerRank *(React, CSS, JavaScript)* Jul 2026

Javascript Basic – HackerRank *(JavaScript, Problem Solving)* Jul 2026

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Libraries & Frameworks: React, Next.js, NestJS, Redux Toolkit & RTK Query, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, React Hook Form, Zod **Databases:** PostgreSQL
Tools & Platforms: Git/GitHub, Vite, pnpm, PostHog, AWS, Supabase, Vercel, Electron, Claude
